

Please use this process to scan or rescan the **Dish VIP211** receiver to ensure that you are receiving all of your channels:

For this receiver, you should have this remote

(note: your remote will not have a green tab at the bottom, it will be silver.):

Step 1: Turn on your television and receiver.

Step 2: Press the Menu button on the remote. This will open the Main Menu shown in figure 1.

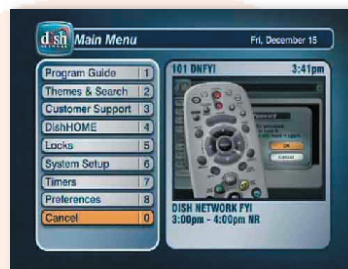

Figure 1.

Step 3: Press the 6 button or use the arrow buttons to highlight the **System Setup** option on the screen and press the Select button on the remote. This will open the System Setup Menu shown in figure 2.

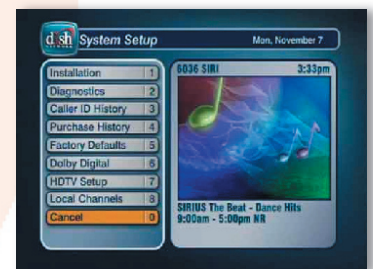

Figure 2.

Step 4: Press the 1 button or use the arrow buttons to highlight the **Installation** option on the screen and press the Select button. This will open the Installation Menu shown in figure 3.

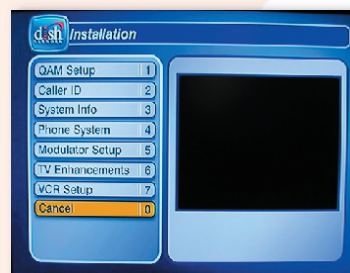

Figure 3.

Step 5: Press the 1 button or use the arrow buttons to highlight the **QAM Setup** option on the screen and press the Select button. This will open the QAM Scan/Signal Menu shown in figure 4.

Figure 4.

Step 6: Use the arrow keys to select **Scan Range**
From and use the number buttons to enter 555.

Step 7: Use the arrow keys to select **Scan Range**
To and use the number buttons to enter 861.

Step 8: Use the arrow keys to select the **Scan**
option and press the Select button. This will start the
scanning process shown in figure 5.

This can take up to 15 minutes to complete. When
finished, you will see the screen shown in Figure 6.

Step 9: Your scan is complete. Press the 'View TV'
button on the remote or press the 'Cancel' repeatedly to
return to programming.
